### ELECTRO-NEURODIAGNOSTIC DEPARTMENT

RM: OP

Name : NELSON, MARVIN	DOB: 12/13/1959	Date: 4/4/2005
Referring MD. RICHARD LEVINE	Record #: 35,478	

HISTORY: Violent outbursts with lack of recall of event.

PATIENT COOPERATION: Good.

EEG DESCRIPTION: This EEG revealed well-formed alpha activity at approximately 9-10 Hz. Background rhythms were symmetrical when the right and left hemispheres were compared. There were no epileptiform appearing discharges at any time during this EEG. During drowsiness the recording revealed disorganization of background rhythms with an excess of theta activity at 5-6 Hz.

ACTIVATION PROCEDURES: Hyperventilation and photic stimulation did not activate the recording.

EKG: Normal sinus rhythm, at a rate of 66 beats per minute.

INTERPRETATION: This is a normal EEG.

DD: 04/05/2005  
DT: 04/06/2005  
BCR/at
